## Portable Lift Tables

These practical and economical portable lift tables provide a convenient and cost saving solution to numerous material handling situations. The perfect answer for order picking, die handling, assembly operations or use as an efficient delivery cart. The Maxx-Mini Lifters are designed to reduce employee injuries and increase productivity.

With nine different models from which to choose, the Maxx-Mini Lifters have proven to be indispensable in all material handling operations. Ranging in capacities from 330 lbs. up to 2,200 lbs., they can handle virtually any job, big or small.

### Standard features include:

- Upper lift limit by pass.
- Dependable hydraulic system
- Poly wheels and casters
- Quality fit and finish
- Brakes on swivel casters
- 1 year limited warranty

*Note: All capacities are calculated on evenly distributed loads.*

## MAXX-MINI LIFTS

### Portable DC Electric Lifts

**Model No. MMLE-100**

**Model No. MMLE-50D**

Includes:

- Rechargeable Battery
- External Charger
- Locking Foot Brakes

These economical portable DC electric lift tables are a convenient solution to many material handling situations. The efficiency and ease of operation of an electric lift is frequently preferred over manual pump up type tables.

A simple push button control is conveniently positioned on the handle. An on board 12 Volt battery provides the power to operate the electric motor. An external charger is fully automatic and runs on 110 Volt input.

Two capacities and lift heights are available.

These models are designed for order picking, die handling, assembly or anywhere lifting is required. Ergonomically placing the load at the right height minimizes the possibility of back injury and increases productivity.

ELECTRIC LIFT TABLES				
Model	Capacity (Lbs.)	Table Size (W x L)	Table Height (Min-Max)	Weight (Lbs.)
MMLE-100	2,200	20.5" x 39.75"	19.25" - 37.25"	372
MMLE-50D	1,100	20.5" x 39.75"	19.5" - 63.5"	436

## Electric High Lift

The Maxx-Jack electric lift models are ideal for lifting skids, plastic pallets, wire baskets, or containers with open bottoms. With the optional slide on platform this unit makes a great portable lift table. The electric lift is faster and more ergonomic than pump-up models that are often only one inch per pump. The 12 volt electrical system includes a battery and charger. Push button lift and lower control is in the handle and a magnetic backed remote lift/lower control with 6 ft. cord is optional. An automatic floor lock that keeps the unit from moving while in the raised position is standard. Steer wheels are 6" poly and load wheels are 3" poly.

Model	Capacity	FORK Width	FORK Length	FORK ID	Lowered Height	Raised Height	Overall Length	Overall Height	Weight
MJHLE-N22	2,200 lbs.	20.5"	45"	7.75"	3.25"	31.5"	62.5"	46.75"	328 lbs.
MJHLE-W22	2,200 lbs.	27"	45"	14"	3.25"	31.5"	62.5"	46.75"	350 lbs.

*Options: slide on platform, remote control Capacities are based on even loads.*

## Stainless Steel Electric High Lift

### Model MJHLE-W22-SS

The stainless steel MAXX-JACK Electric High Lift is ideal for lifting skids, wire baskets, plastic pallets or containers without bottom boards. The type #316 stainless steel construction is designed for applications in the pharmaceutical, food and beverage industries or anywhere that stainless steel is required.

Standard specifications include: 12 Volt DC electrical system and push button lift and lower in the handle. The unit also includes a 63 amp battery and a charger with a 10 amp, 110 Volt input.

## Skid Lifters

Includes:

- Rechargeable Battery
- External Charger
- Locking Foot Brakes

Rugged, practical skid lifts from LIFT PRODUCTS are ergonomically designed for lifting applications in various locations throughout the work area. Skid lifters are used in factories, warehouses, tool rooms, machine shops...anywhere lifting is required. And with our ergonomic design, injuries can be reduced and productivity increased.

Four models are available. The manual models are foot pump operated and the electric models are 12 Volt DC with an on board power unit that includes a battery and an external automatic charger that runs on 110 Volt input. A remote control up/down button with a magnetic backed control box and 5 foot cord is available as an option. All models are also available with an optional slide on platform that creates a solid work surface.

Heavy-duty skid lifters offer the stability of a 4-wheel unit. The hydraulic system has the reliability of a simple single stage lift cylinder and the chain over sprocket design features a 2 to 1 lift ratio. This concept allows for reduced effort on manual models and smooth operation on electric models.

Model	Capacity	Fork OD	Fork ID	FORK Length	Lowered Height	Raised Height	Steer Wheels	Load Wheels	Weight
MJHLS-N22	2,200 lbs.	20.75"	8.25"	45.5"	3.25"	32.75"	6" Poly	3" Poly	297 lbs.
MJHLS-W22	2,200 lbs.	27.25"	14.75"	45.5"	3.25"	32.68"	6" Poly	3" Poly	317 lbs.
MJHLS-E-N22*	2,200 lbs.	20.75"	8.25"	45.5"	3.25"	32.68"	6" Poly	3" Poly	446 lbs.
MJHLS-E-W22*	2,200 lbs.	27.25"	14.75"	45.5"	3.25"	32.68"	6" Poly	3" Poly	477 lbs.

\* Battery operated electric units

Note: Electric units have a lift speed of approximately 15 seconds. Manual units require 18 pumps to full lift.

## MAXX-MOBILE

### Adjustable Work Positioners

Adjustable work positioners reduce strain and overexertion by positioning the work load at the height preferred by the user. A telescoping shaft has a safety lever that enables the user to select the most convenient height. The platform can be set at various heights and tilted to a specific angle.

## Tilt & Lift

The MAXX-MOBILE TILT & LIFT provides all the features of a standard portable tilter and the added feature of providing lift. This model can tilt a load up to 90 degrees. The lift feature allows up to 11" of vertical travel. Since all users are not the same size and height and loads often vary, the lift feature provides the best ergonomic solution when loads have to be tilted for access. The tilt and lift features operate independently allowing the user to select the right degree of tilt and the most ergonomic elevation. For specifications and pricing on an electric model, please contact the factory.

Capacity (Lbs.)	Fork Length	Lowered Height	Vertical Travel	Width Between Forks	Degree of Tilt	Weight (Lbs.)
2,200	31.5"	3.35"	11"	22"	90°	392

## MAXX-MINI-LIFT Tote & Platform Lift

This light weight highly maneuverable platform lift is ideal for order picking or general material handling. Its quick lift pump with fold up pedal allows quick and easy height adjustment. With a capacity of 440 lbs., this unit can handle most jobs. It features poly wheels with brakes on the swivel casters. The reliable hydraulic lift cylinder is chrome and includes overload protection. Drawer is standard.

Model	MMS-20
Capacity	440 Lbs.
Raised Height	33"
Lowered Height	8"
Platform Width	20"
Platform Length	24"
Overall Width	22"
Overall Length	37"
Overall Height	38"
Casters	5"
Pumps to Full Lift	15
Weight	99 Lbs.

*Shown with tote-not available from Lift Products.*

# MAXX-ERGO-Lifter

The MAXX-ERGO-LIFTER is a highly maneuverable light capacity lifter designed for multiple material handling applications. It is equipped with a standard platform and has a load capacity of 330 lbs. Ideal for assembly operations, ergonomic applications and other material handling needs. The MAXX-ERGO-LIFTER features a lift/lower button on a flexible control cord that allows the operator to be in the most comfortable position while lifting or lowering loads. The electric lift is battery operated and features an on board charger that runs on 110 volt input. Also available are five optional attachments that customize the unit for specific applications including roll and coil handling attachments and a tote lifter attachment that are bolted on permitting the unit to be changed back to the standard platform when required.

Model	MXE-150
Capacity	330 lbs at 9" load center
Maximum platform height	59"
Lowered height	5"
Straddle ID	18.75"
Straddle OD	23.25"
Platform size	18.5" x 23.5"
Overall size	35" x 23.5" x 70"
Steer wheels	5" swivel with brake
Load wheels	3" swivel
Battery	24 volt maintenance free
Charger	auto on board

Attachment A-1 is used for rolls or coils that require lifting from underneath. Ideal for placing rolls on and off a shaft.

Attachment A-2 is a single ram suited for lifting coils or rolls through the core. The ram length is 24" long and 2" in diameter.

Attachment A-3 is a dual ram arrangement. The ram length is 17.75" long and 2" in diameter. The distance between the rams is 6". It can be used to cradle rolls or can handle two small rolls at one time through the core.

Attachment A-4 is a roll handling attachment designed to handle rolls in the vertical and horizontal position (poker chip position). The unit features an expandable ram that holds the roll by expanding in the core and turning the wheel pictured. The ram is 11" long and is 2.9" in diameter.

## Premium Pallet Truck

- 5,500 lb. Capacity
- Adjustable Push Rods
- Poly Wheels
- Hand Control
- Fork Entry Rollers
- Quality Hydraulic Pump with built-in overload valve
- Heavy Duty Reinforced Forks with gussets to prevent fork spreading
- One Year Warranty

## Standard Features

**Adjustable push rods** keep fork alignment even after years of use.

**Poly wheels** with steel hub for long life.

**Fork entry and exit roller** allows for easy pallet entry and exit.

**Control handle** with convenient "lift," "lower" and "neutral".

Model	Capacity (Lbs.)	FORK Width	FORK Length	Between Forks	Lower Height	Raised Height	Weight (Lbs.)
MJ55-N48	5,500	20.5	48	8"	2.9"	8"	174
MJ55-W48	5,500	27	48	14.5"	2.9"	8"	180

**Options** – Skid Adapters  
– Load Backrest 48" or 60" high
